

Lab-metal[®]

Ready-to-use dent filler & patching compound

- Hundreds of uses!
 - Fill dents in auto body
 - Patch leaks in oil pan
 - Patch gas tank
 - Fix radiator cracks
 - Patch exhaust pipes
- Modify air intake manifold
- Repair blown freeze plug
- Repair cracks in engine blocks

- Apply right from the can - no mixing, measuring or heat necessary.
- Spreads like paste, hardens quickly into metal. Sand to a smooth, metallic finish. Paint it or even powder coat it!
- Repairs, fills, patches and rebuilds metal *and* non-metal items.
- Aluminum-filled putty will not rust, rot, shrink, chip, crack or peel.
- Resists gasoline, oil and petroleum solvents.
